

February 24, 2023

Dear CPTHN Members,

In keeping with the previous year's format, we would like to continue to have abstracts submitted and presented at the CPTHN annual general meeting. We would like to highlight interesting cases that we have and the work that we all do in our institutions. Cases and/or abstracts will be presented each for 5-10 minutes followed by 5 min for questions.

We would like to see both research type abstracts as well as clinical abstracts on interesting clinical cases in the area of hemostasis or thrombosis in our pediatric patients.

We request that you submit the abstracts by March 20, 2023. Notification of successful abstracts to their authors will occur by April 13, 2023. We would encourage that in addition to submitting your own abstracts, that you encourage your residents/fellows to also submit abstracts.

Due to limitations in funding, please note that we may not be able to offer travel and accommodation for all trainees. We will do our best to support as many as we can. Successful applicants will be notified if their travel and accommodation can be covered.

Please email submissions to admin@cpthn.ca and christine.sabapathy@mcgill.ca

Kind regards,

Christine Sabapathy, MD, MSc FRCP(C)
CPTHN, Chair
