

February 20, 2024

Dear colleagues and friends,

We would like to continue the tradition of abstract presentations at this year's AGM. We would like to highlight interesting cases or research that is being done across the country. Abstracts will be presented each for ~10 minutes followed by 5 minutes for questions.

We encourage both research and clinical abstracts on interesting clinical cases in the area of hemostasis or thrombosis in our pediatric patients. The AHDCDC may also be requesting abstracts to be submitted to them and you may be wondering which abstracts you submit to one organization vs the other.

Abstracts that pertain to pediatric thrombosis should be submitted to the CPTHN meeting. Abstracts that pertain to ITP and related disorders (Evans, ALPS) and their management, pediatric platelet disorders, rare inherited coagulation disorders, vascular tumors/malformations in children and their management can also be submitted to the CPTHN meeting.

Abstracts that pertain to neonatal hemostasis including hemophilia or von Willebrand Disease can be submitted to AHDCDC, but we will also consider these abstracts in our evaluation.

The abstract submission deadline is **March 17, 2024**. Notification of successful abstracts to their authors will occur by April 1, 2024. We would encourage that in addition to submitting your own abstracts, that you encourage your trainees to also submit abstracts.

Please click here to submit your abstract: [Click here to submit your abstract](#)

Kind regards,

Christine Sabapathy, MD, MSc, FRCP(C)  
Chair, CPTHN  
Montreal Children's Hospital  
McGill University Health Centre, Montreal
